

Computer Monitoring Service

Could you function without your computers?

Business' challenge

When you have an office full of workers you need your Computers and ICT to function smoothly and always be available – you don't want glitches!

With all your important financial and administration data on your Computers the last thing you need is for this to be unavailable especially when producing important data and reports.

With our Computer Monitoring Service we will be proactively checking your systems every day so that we can anticipate and remedy problems before they wreck your day. Being predictive, we can then spend more quality personal time with you solving your challenges as opposed to fire fighting your issues.

✓ Event Logs

Actively monitoring your Computer's event logs to ensure errors are checked and addressed.

✓ Backup Check

Checking to ensure your backup has performed successfully – if not we'll check it and diagnose the situation helping you to secure your data in the event of a failure.

✓ CPU

Keeping a trusty eye on those processes that swallow the CPU cycles, allowing us to plan ahead should your server not be capable of its duty.

✓ Disk Space

Monitoring your disk space ensuring you never run out of space to store your crucial files.

✓ Patch Management

Ensuring your Computers have the latest updates and patches keeping it in tip-top health.

✓ Services

Keep on running! We'll keep your Computer and server running by monitoring those critical services which keep your business up and running such as exchange services.

✓ Memory

By monitoring physical memory and page files we can ensure your computer has the oomph behind it to keep up with the day to day challenges.

✓ Health

We will routinely run tasks to keep your computers healthy – defrags, disk cleanups etc.

✓ Activity

We'll give you a report on what we've been doing on your computer's to ensure you are happy with the job we are doing.
